Why we believe Yuno is the right partner for AppMaking

TRULY GLOBAL ORCHESTRATOR

Global **provider coverage + local rails** to launch and scale markets fast

A DEDICATED TEAM FOR APPMAKING

On-the-ground team for **continuous support**: KAM, TAM, Solutions Engineer, and Fraud & Optimization specialists

PAYMENTS-AS-A-SERVICE FOR COMPLEX NEEDS

We **co-create, operate, and continuously optimize** your payments stack end-to-end

AWARD-WINNING AND RECOGNIZED BY CATEGORY LEADERS

Named a **World's Top Fintech Company and #1 Best Payment API (2025)**. Trusted by Uber, Qatar Airways, Rappi, GoFundMe

INFRASTRUCTURE RESILIENCE

Engineered for high-concurrency spikes. Currently supporting **high-velocity merchants** where uptime and latency are critical to the user experience

A Complete Suite · Four Pillars · One Brain

Designed to scale with your volume, with AI that delivers insights, not just dashboards

460+

INTEGRATIONS

01

ORCHESTRATION

Route & recover

Orchestration engine

Pay-in, payouts, tax, KYC/KYB, fraud and reconciliation on one control plane.

Smart routing

Per-transaction decisioning.

Monitors & auto-failover

Checkout stays live, always.

190+

COUNTRIES

02

CHECKOUT & SDKS

Convert everywhere

Customizable checkout

Local methods, native feel.

Subscription management

Recurring, with less engineering.

Mobile SDKs

One interface, iOS + Android.

1,000+

METHODS

03

SECURITY & RISK

Protect every card

PCI Vault Tokenization

Stay valid across networks.

3DS authentication

Reduce fraud, lift auth.

Account updater

Credentials always fresh.

Network tokens

Lower scheme fees, higher approvals.

180+

CURRENCIES

04

AI & INTELLIGENCE

The brain

Analytics

Fees, FX, approvals. Decision-ready.

Reconciliation

One ledger across every PSP.

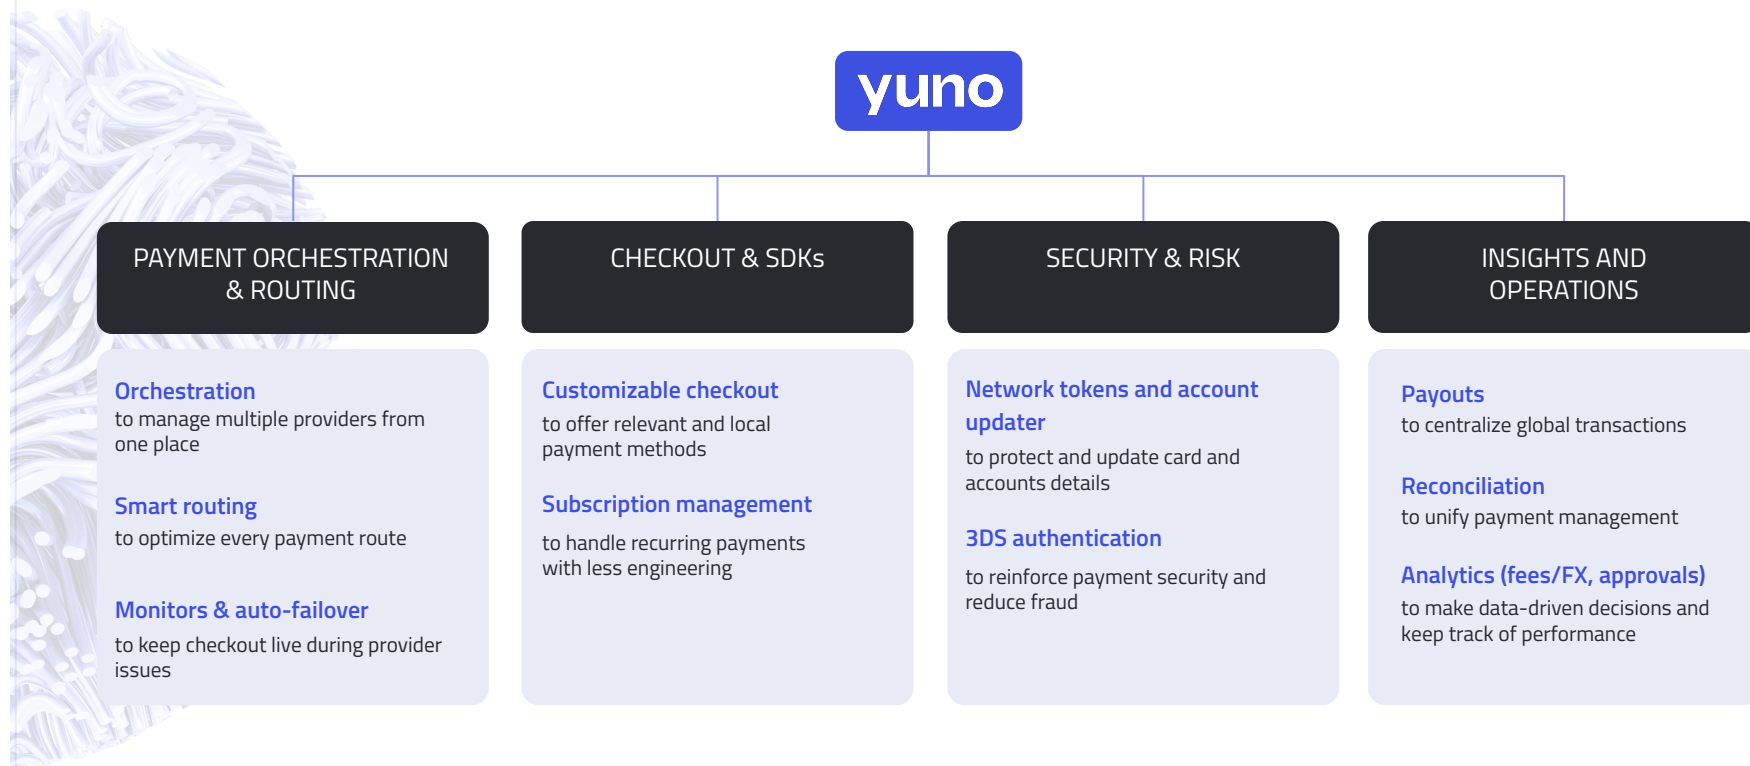

Payments Concierge

Natural-language copilot for payments ops.

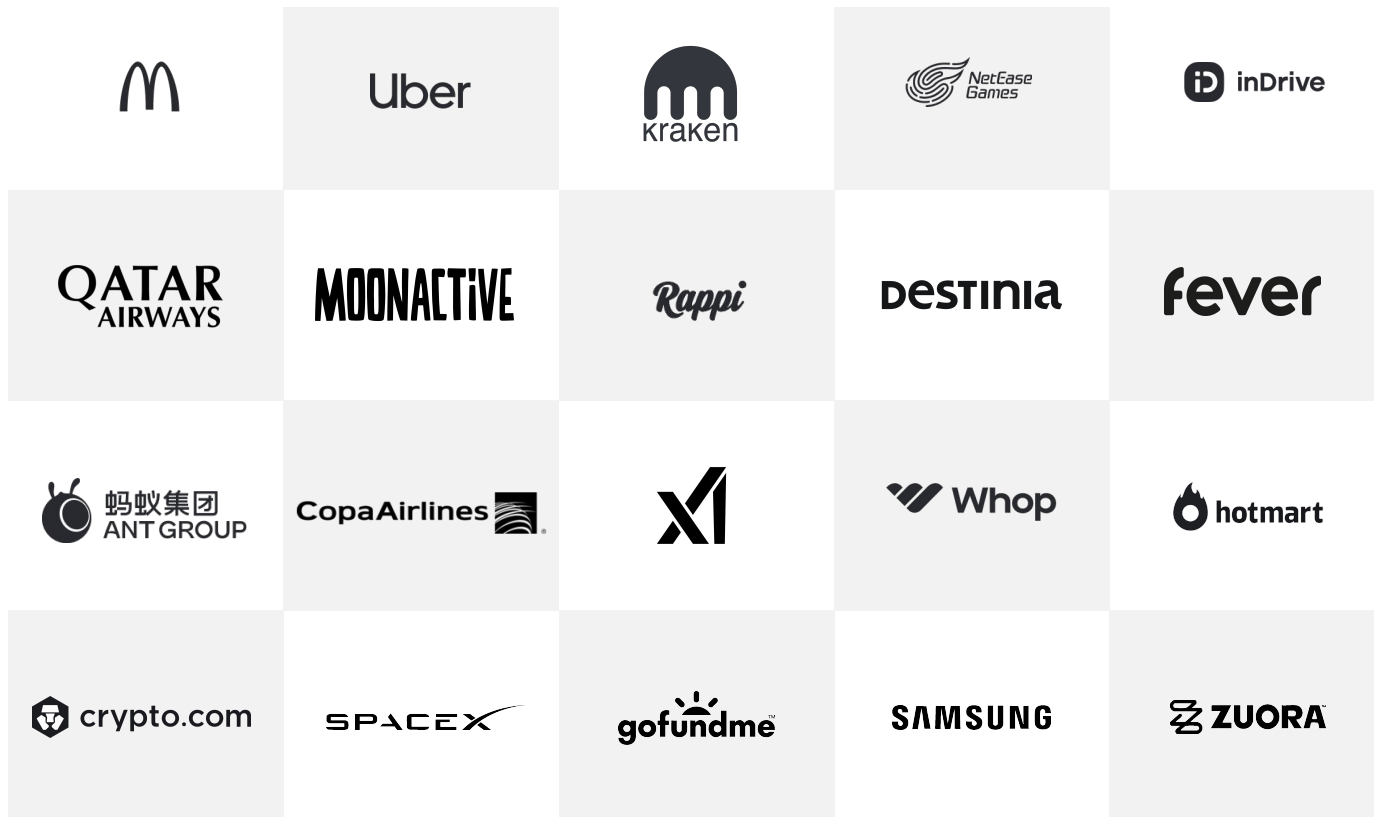

BACKED BY THE WORLD'S MOST ESTEEMED INVESTORS

Yuno provides a complete suite for global payments teams

Yuno is trusted by **leading companies** worldwide

World-class, merchant-first team built by global payment operators

Yuno is the global payment partner to scale AppMaking

Global payment method coverage and leading capabilities for payment routing and orchestration, position Yuno as a best-in-class partner for AppMaking

Key Advantages

- Higher approvals, lower cost
- Your routing platform stays, Yuno extends it
- Network tokens across all seven providers
- Reporting and analytics

Proposal

AGENDA

A fee that grows slower than your volume

A platform fee plus a rate per successful transaction. Both step as you ramp: **\$10,000 a month at the start, \$15,000 fully ramped**. Declines cost nothing.

THE RAMP

SUCCESSFUL TRX / MONTH	PLATFORM + PER TRX	TOTAL
0 – 25,000 Months 1 to 3	\$5,000+\$0.20	\$10,000
25,001 – 50,000 Months 4 to 5	\$5,500+\$0.12	\$11,500
50,001 – 100,000 Months 6 to 7	\$6,500+\$0.065	\$13,000
100,001 – 150,000 Months 8 to 9	\$7,500+\$0.05	\$15,000
Above 150,000 Month 10 onward	\$7,500+\$0.05	\$15,000+

Totals shown at the top of each band. Above 150,000, the same \$0.05 applies to every extra successful transaction.

WHAT IT INCLUDES

At every step of the ramp

Dedicated KAM and TAM	Included
Payment methods	+1,000
Payment providers	+450
Anti-fraud tools	+50
Orchestration & rules engine	Included
Smart routing & retries	Included

Every connector maintained by Yuno. Adding a provider later is a routing change, not a new fee.

WHAT IT MEANS FOR APPMAKING

On the projected ramp plan

PERIOD	COST	TRX	EACH
Months 1 to 9	\$109,000	~675k	\$0.16
Months 10 to 12	\$45,000	450k	\$0.10
Year 1	\$154,000	~1.13M	\$0.137

FULLY RAMPED

\$15,000 / month

\$7,500 platform plus \$7,500 in successful transactions at 150,000 a month. \$180,000 a year.

The step is set by successful transactions in the month, not by the calendar. No setup fee, and expected months follow Appmaking's ramp plan.

PENDING SCOPING

Priced separately once scoped together

Not part of the fee above.

Subscriptions engine Token vault & network tokens Reconciliation Verifi & Ethoca alerts

APPENDIX

What Yuno unlocks 1/2

CAPABILITY/ DIMENSION	YUNO ORCHESTRATION APPROACH	SINGLE PSP/MOR APPROACH	BUSINESS BENEFIT FROM USING YUNO	SUPPORTING STATS
Approval Rates	Smart routing across multiple acquirers and PSPs with fallback and retries	Single acquirer; limited fallback options	Higher approval rates = more revenue	Multi-acquirer setup boosts approvals by 4–16%
Latency & Conversion Impact	Optimized transaction routing for minimal latency	Latency from fixed routing or distant endpoints	Faster checkout = fewer cart abandonments	100ms delay = 7% drop in conversion (Amazon)
Local Payment Coverage	Access to 300+ local/global methods via one integration	Limited methods tied to PSP roadmap	Better conversion via locally relevant methods	8–12% uplift when offering local APMs
Go-to-Market Speed	Rapid market entry via pre-integrated methods; weeks not months	Slow rollout; new markets require new integrations	Accelerated time to revenue in new markets	Yuno does 20–40 Integrations Monthly
Cost Optimization	Routes to lowest-cost provider; avoids cross-border fees	Fixed fees; limited cost optimization	Lower transaction costs; higher margins	Domestic routing reduces FX & fees
Redundancy / Failover	Built-in redundancy with auto-failover between PSPs	Single point of failure if PSP is down	Avoid downtime revenue losses	Downtime costs \$100K+/hour (Amazon)

What Yuno unlocks 2/2

CAPABILITY/ DIMENSION	YUNO ORCHESTRATION APPROACH	SINGLE PSP/MOR APPROACH	BUSINESS BENEFIT FROM USING YUNO	SUPPORTING STATS
Fraud Management	Multiple fraud tools + dynamic rules across regions	Single fraud engine; harder to customize	Lower fraud + fewer false declines	False declines cost \$443B globally (2021)
Reporting & Visibility	Unified dashboard with real-time global reporting	Fragmented reports; limited real-time data	Faster decisions; less manual work	Reconciliation reduced from weeks to hours
Engineering Effort	One API for global access; minimal dev overhead	Multiple custom integrations required per PSP	Dev team focused on core product	80%+ of IT teams prefer orchestration, saves c. 80% on development costs
Flexibility to Test/Scale New PSPs	Instantly test/scale PSPs via dashboard; no dev work needed	New PSPs require full integration projects	Continuous optimization and agility	45%+ of merchants cite agility as top benefit
Negotiation Leverage	Volume control across PSPs increases fee negotiation power	Locked-in pricing and terms	More favorable processing terms	Orchestration increases leverage for fee negotiations
Customer Experience Metrics	Localized, fast, and reliable checkout with preferred methods	Generic experience; more errors and abandoned cart	Higher satisfaction and loyalty	76% abandon carts without preferred payment method

Payments have become a strategic bottleneck that impact the entire organization

“We **invest heavily in growth** of our customer base, but even a few percentage points of **failed payments at checkout erase that growth**”

– Chief Commercial Officer, online marketplace

“Whenever a provider goes down, **our teams have to be called in the middle of the night** to manually resolve the issue and reroute the payments”

– Chief Operations Officer, equipment manufacturer

“Two acquirers can deliver the same volume with a meaningful gap in a cost, yet **we lack the flexibility to optimize routing** to take advantage of this”

– Chief Financial Officer, delivery platform

“We apply conservative rules to prevent fraud, which also causes a **significant number of legitimate transactions to not go through**”

– Head of Risk, retailer

“Every **new market adds another payment integration, another failure point**, and more operational drag. It slows us down exactly when we want to scale”

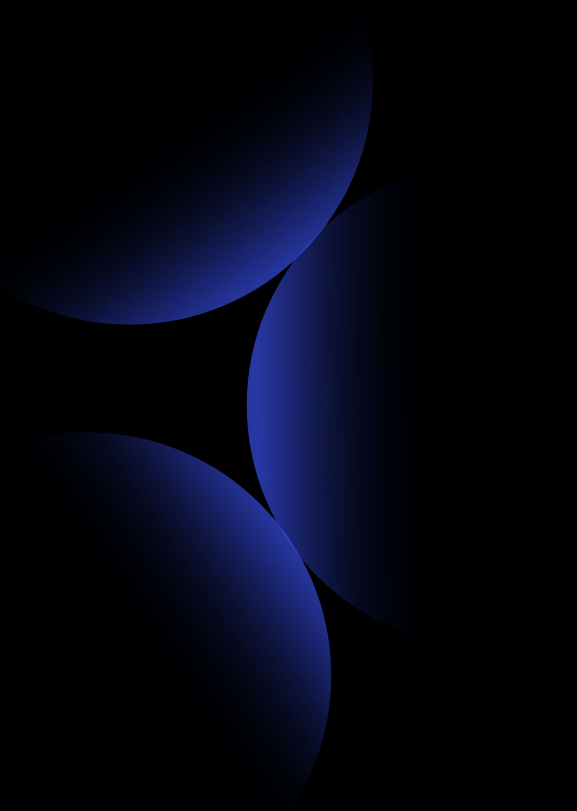

– VP of Engineering, global ecommerce company

“We know there’s revenue on the table, but without visibility into routing, costs, and failures, **we’re making decisions blind**”

– Head of Payments, digital marketplace

“Payments should just work. Instead, **our teams spend time firefighting providers instead of improving conversion** and customer experience”

– COO, international SaaS platform

Let's grow together
