Payments Concierge

Your intelligent payment operations assistant

What is Payments Concierge?

A conversational AI assistant that works wherever your team communicates — Slack, WhatsApp, or any chat platform — helping you understand and analyze your payment operations — approval rates, declines, and reports.

↗ **ASK IN NATURAL LANGUAGE**

No special commands. Just type your question.

↗ **INSTANT ANSWERS**

Insights in seconds, not hours of manual analysis.

↗ **AVAILABLE 24/7**

Self-service insights without waiting for analyst availability.

The Problem We Solve

✗ WITHOUT PAYMENTS CONCIERGE	✓ WITH PAYMENTS CONCIERGE
Hours building reports manually	On-demand reports in seconds
Discovering declines days later	Instant decline analysis
Guessing which PSP approves more	Approval rate comparison by PSP
Multiple clicks to navigate dashboard	Simple natural language conversation
Waiting for analyst availability	Self-service insights 24/7

How Does It Work?

Ask questions. Get answers. It's that simple.

Payments Concierge

How was my approval rate last week?

Your overall approval rate this week was 87.3%, a 1.2% increase from last week. dLocal had the highest rate at 91.2%, while Adyen was at 84.1%. Visa credit cards performed best at 89.5%.

 Summary with trends

 Breakdown by PSP

 Actionable insights

Product Features

↗ **CHAT INTERFACE**

Conversational AI for transaction queries, WhatsApp-style. No special commands.

↗ **APPROVAL RATE ANALYSIS**

Insights on approval rates by provider, payment method, and region.

↗ **TRANSACTION REPORTS**

On-demand reports by period, PSP, payment method. No waiting for manual exports.

↗ **DECLINE ANALYSIS**

Breakdown of declined transactions by error type, PSP, and trends.

What Can You Ask?

Natural language queries across 5 key categories — just type like you're chatting.

APPROVAL RATE ANALYSIS

"How was my approval rate this week?"

"Compare dLocal vs Adyen vs Mercado Pago"

"Best day for approval rate?"

REJECTION ANALYSIS

"What are the main rejection reasons?"

"Which PSP has the most rejections?"

"Most fraud rejections by country?"

TRANSACTION ANALYSIS

"How many transactions today?"

"Average ticket by payment method?"

"Transactions by country (7 days)?"

PROBLEM INVESTIGATION

"Why did my approval rate drop on Tuesday?"

"Was there any problem with Adyen last week?"

"What changed between this week and last?"

COMPARISONS

"Compare all my PSPs in the last 30 days"

"Which PSP works best for credit cards?"

"Compare domestic vs international cards"

Reports & Document Export

Generate and download reports in multiple formats — just ask.

↗ CSV

Tabular data for your own analysis

"Export this week's transactions to CSV"

↗ EXCEL (.XLSX)

Formatted data tables

"Export this month's rejections to Excel"

↗ PDF

Formatted reports for sharing

"Generate a PDF with the monthly approval rate summary"

↗ POWERPOINT (.PPTX)

Presentations ready for meetings

"Create a presentation with this month's analysis for my boss"

↗ WORD DOCUMENT

Detailed reports

"Generate an executive report of Q4 performance"

↓ All exports are generated on-demand and ready for immediate download.

Train Your Concierge & Set Alerts

Teach Payments Concierge to proactively notify you — hourly, daily, or weekly.

ALERT TYPES

↘ Approval Rate Drop

'Notify me if my approval rate drops more than 5% in a day'

Rejection Spike

'Notify me if fraud rejections exceed 3%'

Unusual Volume

'Notify me if transaction volume drops more than 20%'

SCHEDULED REPORTS

Weekly

'Notify me every Monday with a summary of the previous week'

Daily

'Notify me daily at 9am with the previous day's volume'

Hourly

'Alert me immediately if there are more than 100 rejections per hour'

ALERT CHANNELS

- Fast support (<4h)
- Iterate based on feedback

↗ WEEK 4

REVIEW & UPGRADE

- Feedback interviews
- Metrics analysis
- Inclusion of new v2.0 features

Frequently Asked Questions

Does it replace the Tech Support team?

No. The Payments Concierge is a self-service analytics tool for merchants. It does not handle outage communications or incident management — that remains with Tech Support. The Concierge focuses on data insights, reports, and proactive alerts.

How do merchants learn to train and customize it?

Merchants can teach the Concierge directly through chat. For example: "Alert me when insufficient-funds rejections exceed 10% on any PSP." They choose which alerts matter to them — no need to receive everything. They can also ask for specific insights like best day/time to retry or optimal retry rules.

How many people from my company can use it?

Everyone in the same chat channel where the Concierge is deployed — whether it's Slack or WhatsApp — can interact with it. During the pilot there are no user limits, so your entire team can benefit from it right away.
